

## Flushing Systems Waterfree Urinal & Accessories

The Waterfree Urinals work completely without water or the requirement for a flushing device and is suitable for all new and most existing applications. The system is touch-free, easy to install and reduces water and sewer charges as well as delivering improved restroom sanitation.

Waterfree Urinals eliminate and/or minimize common problems including:

- Urinal odours
- Flush valve leaks/repairs
- Low water pressure
- Expensive flush sensors
- Increasing water/sewer costs
- Restroom shutdowns
- Stoppages and over-flows
- High demand on septic tanks
- Vandalism
- Line encrustations
- Mitigation for water usage

## Waterfree Urinal & Accessories

### Waterfree Cartridge

LWG-WF-CRT

Recyclable, long lasting and inexpensive. The patented vertical waterfree cartridge design provides superior efficiencies compared to other more complicated trap arrangements. It does not need to be cleaned out as it is simply changed out. It also helps retain urine sediments. Urinals without cartridge inserts may clog the urinals's internal trapway.

### Package includes

- LWG-WF-U21 - Waterfree Urinal
- LWG-WF-CRT - Waterfree Cartridge
- 1-EXT - Cartridge Extractor
- AQ-GRN-1L - AquaGreen

### Cartridge Extractor

1-EXT

This tool removes the cartridge from the urinal. Made of #304 stainless steel.

### AquaGreen

AQGRN\*

1L/4L liquid trap seal for Zurn Waterfree Urinals with no mixing required. It maintains a sanitary, environmentally friendly and odor-free installation.
